

The Spokane County Medical Society offers Category 1 CME programs to physicians in Spokane and the surrounding area. We ask that you please take some time to respond to this survey as it will aid in determining the curriculum that will be planned for 2008. Please fax this survey back to the SCMS at (509) 325-5409.

1. General clinical programs I would attend include:

- 37% Cardiology 25% Geriatrics 27% Neurology 14% Pathology
39% Dermatology 44% Infectious Disease 22% OB/GYN 23% Pediatrics
27% Endocrinology 25% Mental Health 11% Oncology 5% N/A
20% Gastroenterology 11% Nephrology 33% Orthopedics

Other: Surgery, rheumatology, anesthesiology, emergency medicine, pain management, fm, urology, nutrition update, ophthalmology, anesthesiology, otolaryngology

2. Specific clinical topic programs I would attend include:

- 18% Cardiac risk factor management 18% Moderate (conscious) Sedation & analgesia
23% Cerebrovascular Disease/Stroke dx/tx 30% Obesity Management
35% Diabetes dx/tx 32% Osteoporosis dx/tx—bone health
29% New Drug Therapies 22% Common Psychiatric Disorders
33% Headache and pain tx/management 27% Diagnostic Radiology
48% Infectious Disease—use of Antibiotics/tx 23% Sleep Disorders
14% N/A

Other: Hypertension management, neuroradiology (reading back & neck MRIs especially), any orthopedic topics, anesthesiology, smoking cessation, preventive medicine, chronic pain, arthritis, overactive bladder, BPH, prostate cancer, incontinence, pain management, chronic pain, neuradiol, pain management, common musculoskeletal problems

3. Non-clinical programs I would attend include:

- 22% Computers in the medical office 16% Medicare Tips
24% EMRSs for clinical management 4% Online Lab and Radiology results
28% Financial management strategies 24% Physician burnout
11% HIPAA/privacy/risk management 29% Redesigning your practice for profitability
19% N/A

Other: _____

4. My preferred day to attend a 3 hour CME program is (pick one):

- 8% Monday PM 27% Tuesday PM 32% Wednesday PM 18% Thursday PM 16% Saturday AM
3% N/A

5. My preferred learning style is:

- 80% Lecture 38% Case presentation 14% Group discussion 5% N/A

6. Did you attend any Spokane County Medical Society Category 1 CME programs in 2006?

- 51% Yes 48% No 1% N/A

7. If you answered "yes" to question #6, did the CME course result in any change I how you practice medicine, and if so, how?

- 35% Improved patient care 3% Improved my quality of life 3% Improved my efficiency 59% N/A

8. Please suggest how SCMS CME courses can be designed to influence your practice/patient care:

- practice management
- ways to save on health, dental, disability, life insurance
- focus clinically on relevant updates and reviews
- aim for having the most scholarly specialists present and use an evidence base approach as much as possible
- quick ones at lunch time
- give examples from clinician's offices or practices; case studies are excellent
- I get up at 4:30 am so classes on weekdays M-Th that end at 8:30 or 9 pm are too late for me—short ones done by 8:00pm would be better
- Thanks!
- keep up the good work
- maybe some 1 hour presentations in the evening or lunchtime presentations at Valley Hosp & MC
- helpful updates, confirmation generally of what I already do
- accessible without travel
- can they be telemedicine so we can see live from a remote place?
- lecture with common case studies
- not really applicable to my practice, I only do critical care
- topics in anesthesiology specialty
- cost is biggest deterrent
- subspecialty directed- "Ortho day," "Cardiology day," "Primary Care Day," "GI day," etc
